

I have just returned home from and extended US Tour and depended on XM Weather and Traffic for over 36,000 miles of trouble free, accurate and on demand info in advance of my arrival. I pay for these services and it should not be censored in any way by anyone. How about going after the "free" cable or satellite soft porn channels that I can't get rid of by any means? I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of service I demand and deserve.
